Re: Facility Compliance Inspection Report for Overdale Large Type 1 Solid Waste Compost  
Facility dated July 31, 2013

Dear CT,

Please consider this as our response to the above referenced Inspection Report. The following is our response to certain items delineated in the section entitled **ADDITIONAL COMMENTS.**

**Item #2:** We have noted your comment on ensuring the compliance temperatures for compost are for three consecutive days and have contacted WRICO to see that this does not happen again. WRICO has also been informed about producing a drawing with temperature logs.

**Item #10:** We have noted your comment concerning the height of the large windrow of compost nearing the maximum height. Please understand that we will make every effort to comply with this standard. With the rainfalls we have received over the past several months, much storm damage debris has been generated requiring us to find extra room, thereby the tall piles. Thank you for your patience.

**Item #11:** It is our plan to no longer accept engineered wood products (ewp) at our yardwaste facilities. We have informed two of our customers of this new policy and expect compliance. In the meantime we will treat ewps as reject material and dispose of it along with the other reject material.

**Item #15:** We have noted your comment on a fire lane and WRICO has been reminded of this requirement.

If you have any comments or questions please do not hesitate to call me at (336) 399-5051.  
Thanks!

Sincerely,

*Edward Gibson*

Edward Gibson, P.E.
